WHITE. BLACK. IT'S SO ME!

My life philosophy is simple. I appreciate what suits my habits and my possibilities. I design and arrange my life space in my own way. I choose the collection of appliances that respect my lifestyle. I find it easy to integrate the excellently designed appliances of the Gorenje Simplicity collection in black or white into my home. They join me in living my way. Because they adapt to me, not the other way around. Simplicity!

Beautiful. Simple. Affordable.

simplicity
COLLECTION

Glass. Metal.
Harmony. Presence.
Eye candy.

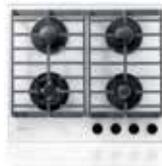

**The way it's
designed –
IT'S SO ME!**

LOGICAL CHOICE

In appliances from the Gorenje Simplicity collection, the most frequently used and the most convenient settings are immediately available – via a single knob.

ADAPT TECH

Advanced appliances memorize our personal choices and suggest them next time we use them. All that's left is to press the button to confirm.

WHITE

SOLID DESIGN

Pure lines, genuine materials and ergonomics allow integrating the appliances into any home.

PERFECT VALUE

As they are well-priced, these appliances offer immediate savings. In addition, advanced technology makes sure you only pay for what you truly need, which leads to extra savings in the long run.

BLACK

OVENS

SMELLS WONDERFUL. THE WAY IT'S BAKED – IT'S SO ME!

< AdaptTech baking

No need to repeat your own settings

The oven will memorize your temperature setting for each preset program and suggest the most recent or the most frequently used setting the next time you use it.

Preservation program

A reliable way to make your preserves

A special preset program will make sure your preserves keep throughout the season and well after that.

^ GentleClose oven door closing system

Extra comfort when closing the oven door. The door will close gently and silently, regardless of the force applied.

< Electronic programming timer with touch control

Easy and clear control

The timer allows you to set the cooking time and to select the right temperature. This and the heating system currently in use can be monitored on a clearly laid out screen. Timer surface is completely smooth and easy to clean.

HOBS

I'M ENJOYING IT. THE WAY IT'S COOKED – IT'S SO ME!

< Gas hob with SimpleOff program timer

Safe, simple, clear, and controlled cooking

Ergonomically designed knob with built-in electronic timer allows setting the cooking time (up to 99 minutes). When the set time expires, the gas burner will be automatically switched off, which will also be indicated by an acoustic signal.

Simple control with SmartControl

Clarity and control in cooking

Cooking time can be set separately for each cooking zone. When the set time expires, the timer will automatically switch off the cooking zone and notify you with an acoustic signal.

^ BoilControl

BoilControl is an automatic system that will temporarily adjust the output power of a cooking zone. After initially operating at maximum power, the cooking zone will maintain the temperature at the desired level to prevent the food from boiling over or overcooking.

> SuperPower induction hob

Fast and efficient cooking and simple cleaning

Induction hobs operate remarkably fast and efficiently to prepare excellent and wholesome food. **SuperBoost** function for rapid and powerful operation allows even faster and more efficient cooking which leads to savings of both time and power.

REFRIGERATORS

IT'S FRESH. THE WAY IT'S COOLED – IT'S SO ME!

< AdaptTech cooling

Keeping the food fresh 20% longer

Adaptive intelligent system monitors, analyzes, and records the use of the refrigerator in weekly intervals. Then, its operation, especially maintaining of the set temperature and the resulting power consumption are adjusted to the identified pattern. When the door is opened, the temperature of the food will not rise as it does in conventional refrigerators; this will hinder the development of bacteria.

IonAir

Keeping the food fresh and tasty up to 10 days longer

Ions generated in the refrigerator eliminate up to 95% of bacteria, viruses, gases, and odours to make sure the air in your refrigerator is always fresh.

^ NoFrost Plus

No frost, ice, or manual defrosting

Modern NoFrost technology uses intensive circulation of cool air to eliminate moisture from the freezer and refrigerator. This prevents accumulation of frost on the food and ice in the appliance interior.

< MultiFlow 360°

Long lasting freshness and lower power consumption

The intensive MultiFlow 360° air circulation generated by intensive multi-point blowing of cool air through ventilation slots located in the column on the back wall of the refrigerator provides constant and even temperature in the entire refrigerator compartment.

HOODS

THE AIR IS FRESH. THE WAY IT WORKS – IT'S SO ME!

< AdaptTech venting

Automatic hood operation

In the automatic operating mode, a sensor in the kitchen hood will sense the impurities in the air, steam, and gases released during cooking, and adjust the fan speed accordingly – and even stop the fan when it is no longer needed.

^ Functional design

In addition to performance, hoods boast genuine materials such as stainless steel in combination with glass. Appealing design is an increasingly important aspect; however, hoods can also provide highly convenient lighting of the cooktop during operation.

^ Halogen lighting

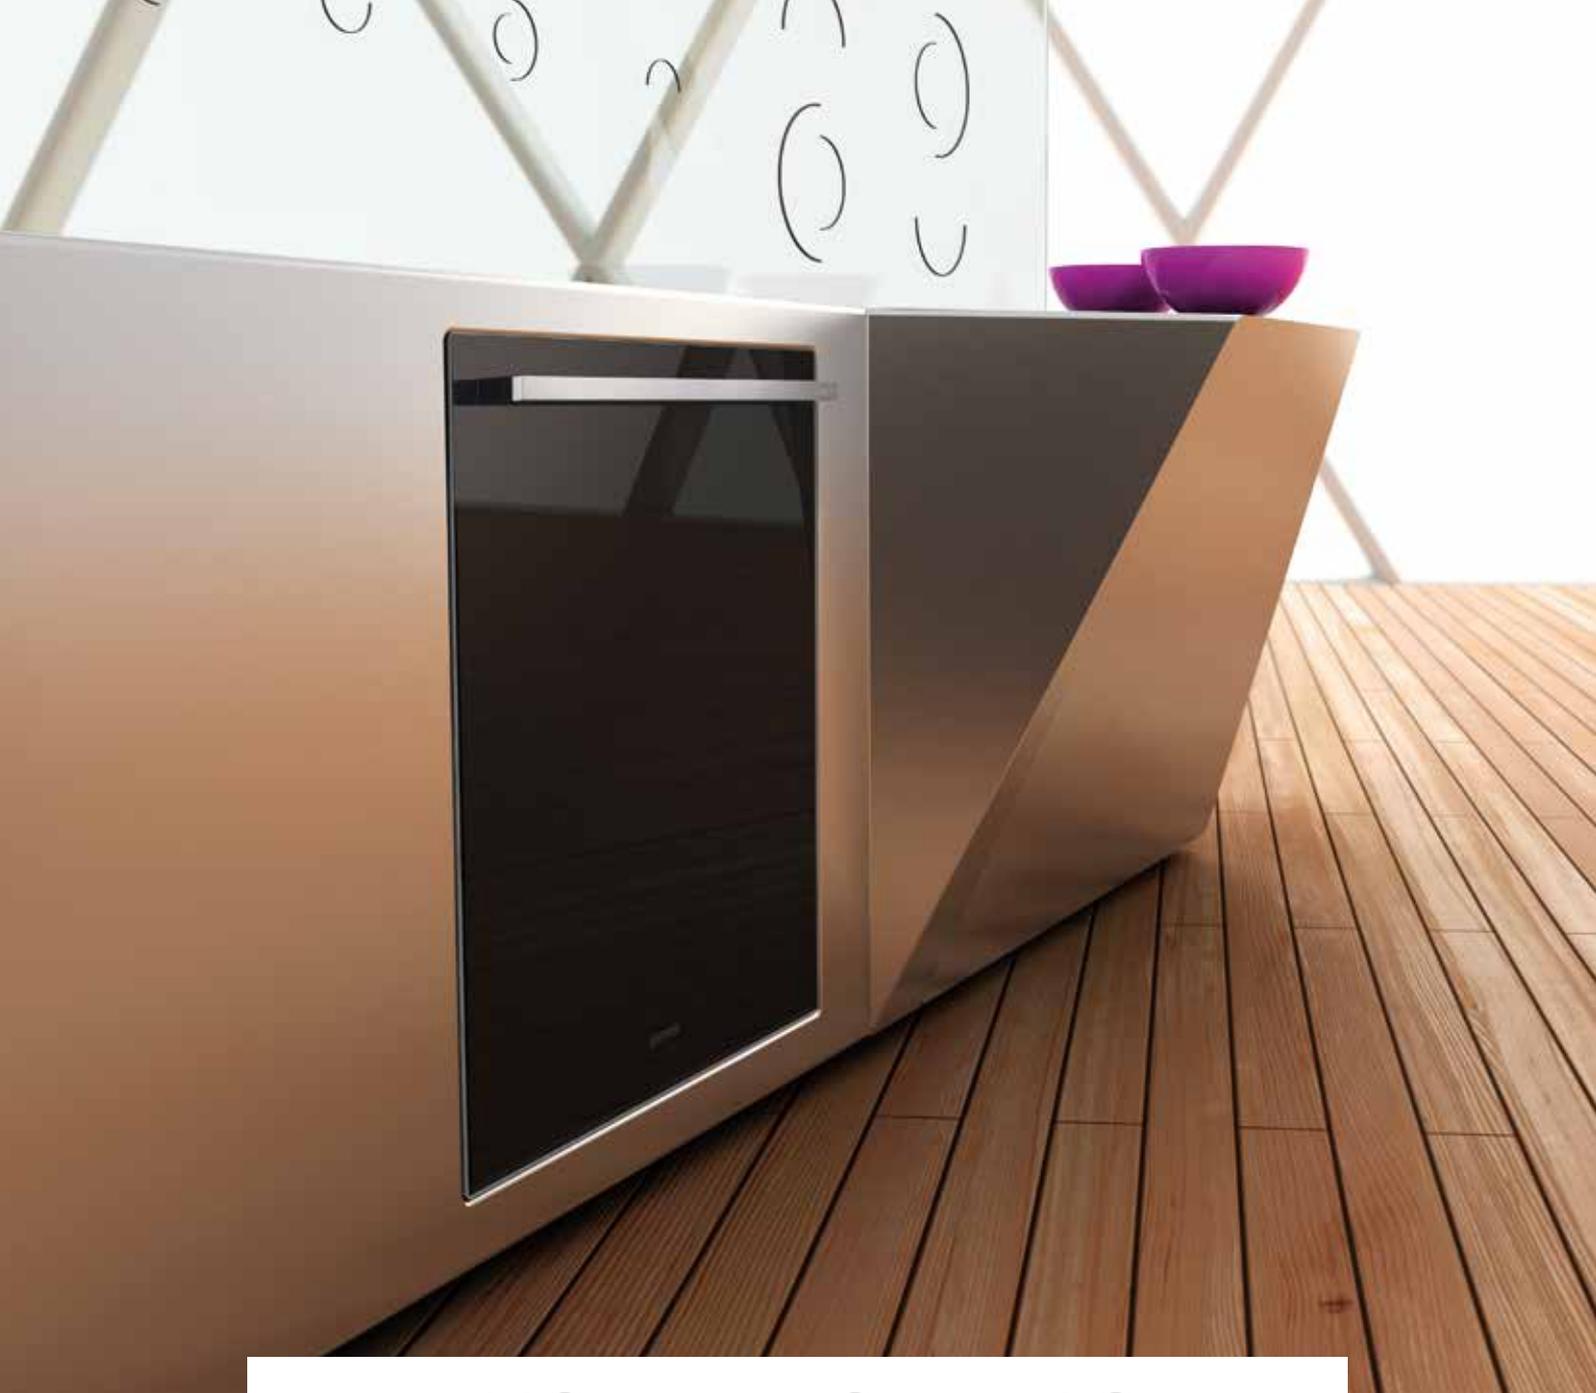

Excellent cooking hob lighting
Extra source of light for optimum cooking hob lighting. Halogen lighting is both more powerful and more economical than lighting with incandescent lamps.

< Easy-to-clean filters

Easier maintenance and longer life cycle

Metal filters in hoods, which are designed to remove fat particles, can be easily removed and cleaned. You can wash them by hand or in a dishwasher using a 'gentle wash' programme.

DISHWASHERS

IT'S SHINY. THE WAY IT'S WASHED – IT'S SO ME!

Preset program start time Clean dishes when you want it

Start of dishwashing program can be delayed by 3, 6, or 9 hours. Running the dishwasher during the lower electricity rate means extra savings.

High efficiency Economical dishwashing

From now on, your dishes will be washed responsibly and with great care for the environment as Gorenje dishwashers fully meet the stringent European guidelines on energy efficiency.

3 v 1

The appliance offers programs specially tailored for use of »3 in 1« tabs.

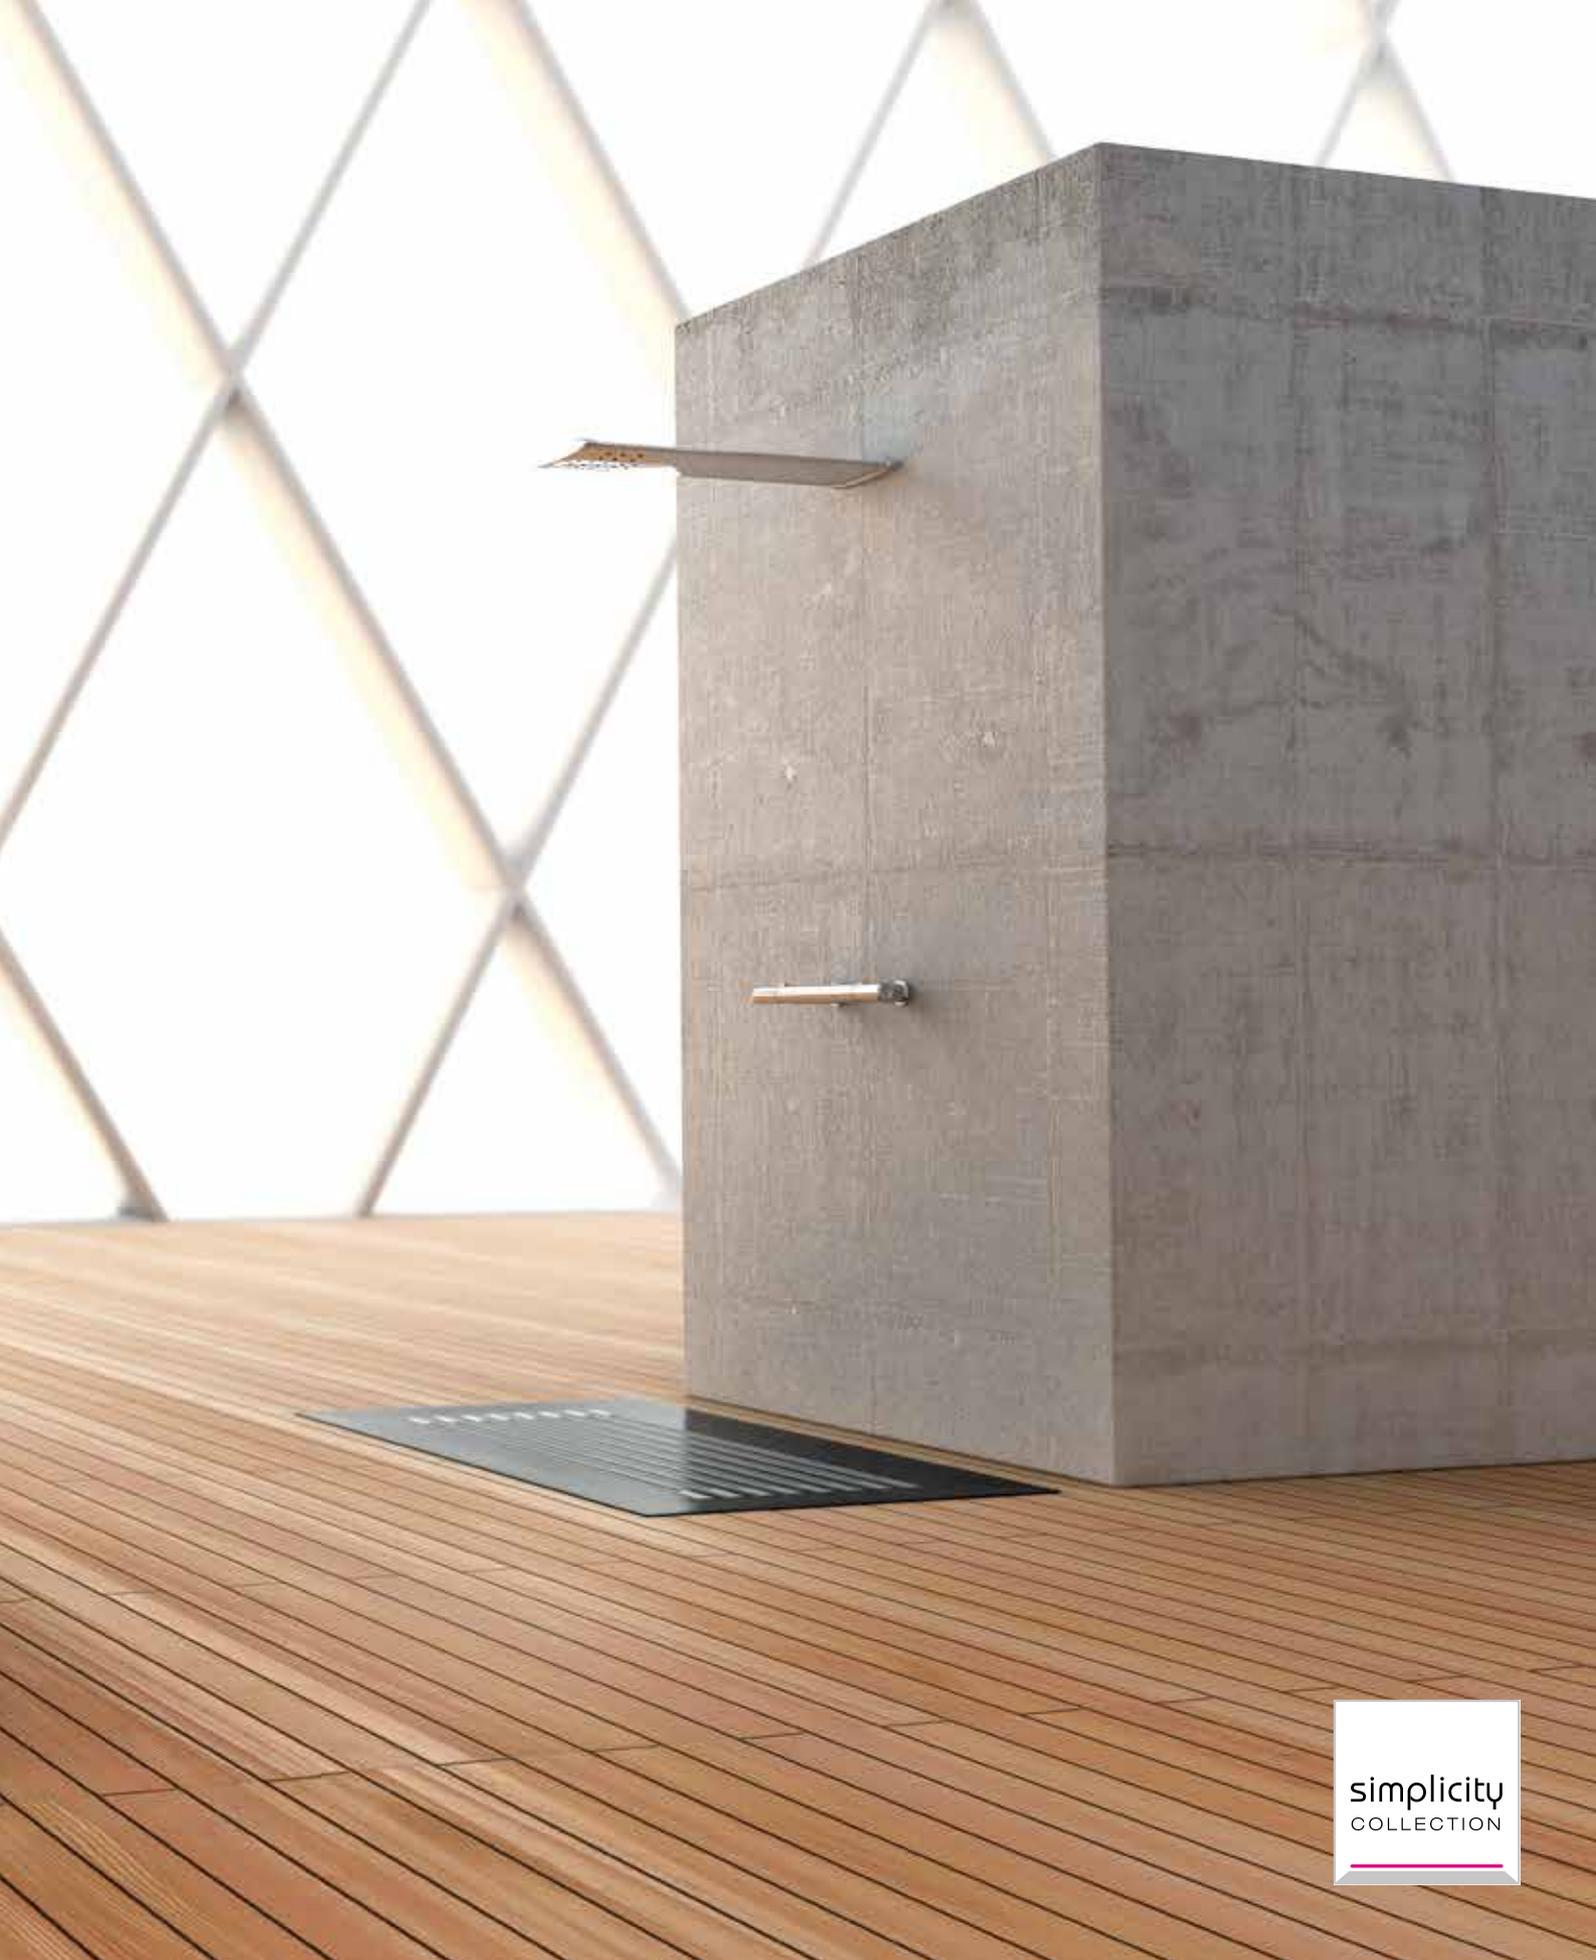

AquaStop Do not worry about water spillage

In case of water spillage, the AquaStop safety system will automatically shut off the water inlet valve and the pump will pump out the remaining water from the dishwasher tub.

WASHING MACHINES

IT'S SPOTLESS. THE WAY IT'S WASHED – IT'S SO ME!

< **AdaptTech washing**

No need to repeat your own settings

The washing machine will memorize your settings for the spinning cycle for each preset program. It will also memorize if you selected higher water level or pre-wash for a particular program. The most recent settings will be suggested when you use the same program again.

SensorIQ sensor technology

Optimum results with considerable savings in power, water, and time

Numerous sensors constantly monitor the washing process. Based on collected data, they automatically adjust the washing process according to the selected program and the type and weight of the laundry.

^ **Programming the start of the washing cycle**

Washed at the right time

All washing machines offer the option to delay the start of the washing cycle by up to 24 hours. This will allow you to make use of the lower electricity rate during the night.

Excellent energy efficiency

Many innovative solutions like the efficient program algorithms, OptiDrum washing machine drum, and QuickWet optimum soaking system, combined with the intelligent SensorIQ sensor technology, deliver excellent washing and energy efficiency. Gorenje Simplicity models boast A+++ or A^{-30%} rating, which means they use 30 % less power than an A energy class appliance.

DRYERS

IT'S SOFT. THE WAY IT'S DRIED – IT'S SO ME!

< AdaptTech drying

No need to repeat your own settings

The dryer will memorize if you used the ExtraDry function, lower drying temperature, refreshment function, or anti-crease function for a particular program.

The most recent settings will be suggested when you use the same program again.

Condenser dryer with a heat pump

Exceptionally economical drying A++

It is the only home appliance to use both the cooling and the heating part of the heat pump. Full use leads to a 50-percent reduction in energy consumption relative to the A class.

^ TwinAir

For evenly dried laundry

Condenser dryers with a heat pump boast a unique air blowing system that allows introducing warm dry air into the drum through two air vents as the drum spins in both directions.

< Programming the start of the drying cycle

Dried at the right time

Start of the drying process may be programmed up to 24 hours in advance. Your clothes will be dried to the previously set level of moisture and ready to be stored in the cupboard or for ironing whenever you feel is most convenient.
